SUMMARY
Web developer with MERN stack expertise, skilled in building responsive apps using React, Node.js, and MongoDB. Ready to contribute and grow.

PROJECTS

Freelance E-Commerce   01-09-2024 – Present
- Description: Building a sophisticated fashion e-commerce platform with key features:
- Backend: MongoDB & Redis integration, Stripe payment setup, JWT authentication (Refresh/Access tokens).
- Core Features: Product/category management, shopping cart, checkout with Stripe, coupon codes.
- Admin Dashboard: Sales analytics and management tools.
- Design & Security: Responsive UI with Tailwind CSS, robust data protection.
- Caching: Enhanced performance with Redis.
- Status: In development, with ongoing updates and feature additions.

Workout Management App

Description: Developed a workout app using React and Bootstrap. Features include JWT authentication, a responsive UI, and a RESTful API for CRUD operations. Users can create custom workout plans and track their progress.

ReactFlix - Movie Database

Description: Built a MERN stack movie database site. Features include movie search, favorite management, trending movies on the homepage, and detailed movie pages. Utilizes React Router for smooth navigation and dynamic routing.

SKILLS
- Front-End: JavaScript, React, Redux, Zustand, Tailwind, SASS
- Back-End: Node.js, Express, MongoDB, PostgreSQL, Redis, JWT
- Other: REST, GraphQL, Git, AWS, , Linux

EDUCATION
Bachelor of Commerce (B.COM)   (2018-2022)
University of Calicut, Malappuram, Kerala
